Freelance Full Stack Web Developer Upwork Inc

06/2022 - 04/2023

As a freelance full stack developer, I specialize in building dynamic websites using React and other cutting-edge technologies. With expertise in frontend and backend development, I create intuitive user interfaces and implement powerful server-side functionalities. I deliver customized solutions tailored to clients' unique needs, ensuring high-quality, performant, and visually appealing websites that elevate their online presence and drive business success.

Achievements/Tasks

- Integrated third-party APIs and services to enhance website functionality and provide seamless user experiences.
- Collaborate with clients to understand project requirements, objectives, and target audience.
- Develop and deploy websites on various hosting platforms, ensuring seamless functionality across different browsers and devices.

PERSONAL PROJECTS

HooBank (05/2023 - 05/2023)

- "HOObank" is a fully functional website built using React.js, Tailwind CSS, and Vite. The website serves as a user-friendly online banking platform where users can access various banking features. Leveraging the power of React.js, the website incorporates dynamic and interactive elements to provide a seamless user experience.
- React.js: The project utilizes the React.js library, enabling the creation of reusable components and efficient rendering for a fast and responsive user interface.
- React States: By implementing React states, the website achieves dynamic behavior, allowing users to interact with different elements and experience real-time updates without the need for page refresh.
- Vite: The Vite build tool ensures quick development and deployment by offering a fast and optimized development environment, resulting in a performant website.

Bank Management System (ATM Simulator System) (02/2023 - 02/2023)

- Built a Java application that functions like a normal ATM
- Features include opening banking accounts, deposit, withdrawal, mini-statement, and pin change

Employee Management System (02/2023 - 02/2023)

- Created a centralized database to manage employee information
- Features include updating, viewing, and deleting employee details
